

## Mapping India's Energy Subsidies 2020: Fossil fuels, renewables, and electric vehicles

2020 Annex Update

#### Introduction

This Annex is an accompaniment to <u>Mapping India's Energy Subsidies 2020: Fossil fuels, renewables,</u> <u>and electric vehicles</u>. It provides detailed background information for all subsidies that have significantly changed since our 2018 review, <u>India's Energy Transition: Subsidies for Fossil Fuels and</u> <u>Renewable Energy, 2018 Update</u>, with the following subsections:

- New summary tables on policies linked to:
  - EV.6: Concession of GST rates on electric two- and three-wheelers
  - TD.15: Construction of a 220 kV transmission line from Srinagar to Leh via Kargil
  - OG.41: Project Management Expenditure (PME) & Information Education and Communication (IEC) expenditure under PMUY
  - o OG.42: PDS Kerosene and Domestic LPG subsidy scheme, 2002
- Description of tax measures used in Section 5 of the main paper, Cost Assessment of Coal-Fired Power in India

For a full overview of subsidy data, readers can also refer to the separate accompanying <u>data</u> <u>spreadsheets</u> that form part of the 2020 update or visit the <u>interactive platform with key trends</u>.

#### **New Subsidy Summary Tables**

Subsidy category		revenue foreg	one $\rightarrow$ Tax br	eaks and spec	ial taxes $ ightarrow$ E	exemptions		
		from special taxes						
Stimulated	Consumption	Consumption						
activity								
Subsidy name	EV.6 Concession of GST rates on electric two and three-wheelers							
Jurisdiction	-	Central government						
Legislation/ endorsing organization	The Goods ar	The Goods and Services Tax Act, 2017						
Policy	The objective	is to reduce t	he cost of elec	ctric two- and	three-whee	lers in the		
objective(s) of subsidy	market.							
End recipient(s) of subsidy	Consumers	Consumers						
Time period	Revised perio	odically						
Background	In order increase the uptake of electric vehicles in the market, electric vehicles were subject to a lower excise duty (12.5% compared to 24% on fossil fuel vehicles) to reduce the cost of electric vehicles in the market. After the introduction of the Goods and Service Tax (GST) in July 2017, the exciduty was subsumed under the GST. Electric vehicles continue to have lower GS rates, at 12%, compared to 28% on fossil fuel vehicles.

#### Description of Coal Tax Measures

Tax type	Producer	Producer							
Tax name	CT.1 Royalty	CT.1 Royalty							
Exchequer	State governn	nent							
Legislation	Mines and Mi	Mines and Minerals (Development and Regulation) Act (MMDR), 1957							
Time period	1957 to prese	nt							
Background	Under this act, every state can set a royalty for coal extracted from mines in its jurisdiction. This royalty doesn't fall under the purview of the GST. Currently, West Bengal has royalty rates set to the grade of coal ranging from INR 4.30 to 6.50 per MT, while other states have a flat rate of 14% on coal prices.

Tax name	CT.16 State Cess on Coal							
Exchequer	State govern	ment						
Legislation	Coal Mines (	Coal Mines (Conservation and Development) Act, 1974.						
Time period	1974 to pres	ent						
Background	States with coal-bearing lands are eligible to enforce a cess on coal that differs from a royalty. As of FY 2019, the majority of the cess paid by Coal India Limited (CIL) is to West Bengal. The government is looking to reform this by asking them to reduce the cess and increase the royalty. In West Bengal, the cess is 25% per MT.							
Amount of tax collected	FY 2014	FY 2015	FY 2016	FY 2017	FY 2018	FY 2019

	as companies However, the	India's thermal power production sector is privatized with public (centre and state owned), private and joint ventures. These power producers are registered as companies in India and pay corporate taxes on their assets and profits. However, the total tax collected is not centrally reported and has not been calculated due to resource constraints.
